

A 2016 ranking of economics journals based on citations in top 5 journals

There have been a number of high quality economics journals launched in the last decade, including the AEJ series and those published by the Econometric Society. Most existing rankings of journals are not updated to include these. I would like to generate discussion on what is an appropriate ranking of economics journals taking into account these new journals.

A simple approach to measuring impact is to measure citations in top 5 journals. The top 5 general journals (AER, ECMA, JPE, QJE and REStud) are almost universally recognized as the top 5 journals in economics, and clearly above the next set of journals. Citations in these journals are roughly of equal quality. These journals, collectively, also cover all areas of economics.

A similar approach to measuring impact was used in the article "A Journal Ranking for the Ambitious Economist" by Kristie M. Engemann and Howard J. Wall. They used an earlier period that did not include the new journals, and focused on citations in a list of 7 top general journals of a smaller set of journals.

The table below shows the results of an exercise we did in the Department of Economics at the National University of Singapore based on recent periods that allow us to measure the relative impact of the new journals, as well as based on a longer period in which the new journals cannot be compared. To get the impact factor of a journal X published in year t and cited in year k, we got an RA to measure the total number of citations in top 5 articles in year k of articles published in journal X in year t, and divide by the number of articles published in journal X in year t.

To get an impact factor over a range of years, say 2010-2015, we apply the same methodology, so aggregate citations in top 5 journals for years in that window of all articles published in a particular journal in the years in that window, divided by the total number of articles published in that journal in the years in that window.

Note we remove any citations in AER Papers and Proceedings, but otherwise all citations in top 5 journals are treated equally. We do not rank JEL or JEP. We scale impact factors so AER has an impact factor of 1.

A 2016 ranking of economics journals based on citations in top 5 journals

The results are given below for the longest period we have data on **2003-2015**.

1	Quarterly Journal of Economics	533	2089	3.919	1.786
2	Econometrica	767	2315	3.018	1.375
3	Journal of Political Economy	447	1331	2.978	1.357
4	Review of Economic Studies	619	1359	2.195	1.000
5	American Economic Review	1341	2944	2.195	1.000
6	Journal of Economic Growth (1999)	155	126	0.813	0.370
7	Journal of Monetary Economics	871	687	0.789	0.359
8	Journal of Labor Economics	329	251	0.763	0.348
9	Rand Journal of Economics	510	340	0.667	0.304
10	Journal of Economic Theory	1430	918	0.642	0.292
11	Review of Economics and Statistics	977	608	0.622	0.284
12	Review of Economic Dynamics	514	316	0.615	0.280
13	Journal of Finance	995	544	0.547	0.249
14	International Economic Review	636	330	0.519	0.236
15	American Economic Review May Issue	1262	583	0.462	0.210
16	Experimental Economics (2003)	352	152	0.432	0.197
17	Journal of International Economics	905	389	0.430	0.196
18	Economic Journal	975	367	0.376	0.171
19	Journal of Public Economics	1341	500	0.373	0.170
20	Journal of Human Resources	444	161	0.363	0.165
21	Review of Financial Studies	1003	359	0.358	0.163
22	Games and Economic Behavior	1340	462	0.345	0.157
23	Journal of Econometrics	1510	519	0.344	0.157
24	Journal of Financial Economics	1285	335	0.261	0.119
25	Journal of Industrial Economics	360	90	0.250	0.114
26	Journal of Development Economics	993	230	0.232	0.106
27	Journal of Risk and Uncertainty	309	70	0.227	0.103
28	Journal of Business & Economic Statistics	502	112	0.223	0.102
29	Journal of Law & Economics	361	79	0.219	0.100
